Re: Bander, N.

Date of Priority: 05/06/1996

***Response to Amendment***

The Amendment filed 02-19-04 in response to the Office Action of 08-26-03 is acknowledged and has been entered.

Claims 144, 156-168, 170-231 are pending.

**The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.**

**New Rejections:**

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 144, 156-168, 170-231 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 1642

The written description in this case only sets forth methods encompassing an antibody or antigen binding portion thereof which binds to the extracellular domain of prostate specific membrane antigen (PSMA), or monoclonal antibodies selected from the group consisting of an E99, a J415, a J533, and a J591. Thus, the written description is not commensurate in scope with the claims drawn to an antibody or antigen binding portion thereof which binds to an epitope of PSMA which is also recognized by a monoclonal antibody selected from the group consisting of an E99, a J415, a J533, and a J591 monoclonal antibody or wherein the antibody or antigen binding portion thereof competes for binding to prostate specific membrane antigen with a monoclonal antibody selected from the group consisting of an E99, a J415, a J533 and a J591 monoclonal antibody. The newly added claims have no clear support in the specification and the claims as originally filed. Hence, this is a **new matter** rejection.

Applicants point out (Remarks, page 17) that support for some of the amendments can be found on page 27-28, and page 38. These passages have been reviewed but do not appear to provide support for the presently claimed antibodies because they do not appear to contemplate nor suggest the discovery, screening, and or use of antibodies that compete or bind to the same epitope as the monoclonal antibodies J415, J591, J533, and E99.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 144-168, 170-177, 180-231, as written, do not sufficiently distinguish over antibodies as they exist naturally because the claims do not particularly point out any non-

Art Unit: 1642

naturally occurring differences between the claimed products and the naturally occurring products. In the absence of the hand of man, the naturally occurring products are considered non-statutory subject matter. See *Diamond v. Chakrabarty*, 447 U.S. 303, 206 USPQ 193 (1980). The claims should be amended to indicate the hand of the inventor, e.g., by insertion of "Isolated" or "Purified". See MPEP 2105.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 144, 156-168, 170-231 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-109 of US Patent No. **6,649,163**. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims includes obvious species of the antibodies currently claimed.

Art Unit: 1642

**All other rejections and or objections are withdrawn in view of applicants arguments and declarations as previously presented.**

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
